2N® Villa Kit

Smart video door entry solution
for family houses and villas

Welcome visitors in style and stop running to the door every time the doorbell rings. This is our new offer for your customers!

2N® Villa Kit is a smart door communication solution that brings comfort, elegance and safety to residents' life. They can answer the intercom video calls via an answering unit in their living room, or via their mobile phone even when they are not at home. Everything is pre-configured and provided in a single box.

What will you find in the box?

2N® Indoor Compact

Handsfree answering unit for the communication with visitors. This indoor unit has a 4.3" display protected by tempered glass. It offers a video preview before the call is picked up and its control is intuitive for all household members.

2N® IP Solo

This stylish IP intercom is designed for outdoor installation. Equipped with a HD camera capable of night vision, the intercom ensures perfect image of the visitor outside even on a dark night. A door strike can be connected directly to the powered output without needing an external power supply.

2N® Mobile Video

Our application which provides availability and reliability to your customers even when they are not at home. With 2N® Mobile Video they can receive a video call from the intercom to their smartphone for free (one-year subscription for two smartphones is included). They can also control the door lock remotely from the app.

PoE switch

Both 2N devices must be connected to the PoE switch, which also provides a power supply to them. Connect the PoE switch to the internet to use the 2N® Mobile Video service.

Real Plug & Play installation

Bring the pre-programmed devices to life simply by connecting them to the PoE switch using UTP cables. Thanks to the pre-set configuration, 2N® Villa Kit is ready for immediate use – make video calls and control the door.
